SUMMARY

Final-year Information Technology undergraduate at SLIIT with hands-on experience in full-stack web, mobile, AI, and IoT development. Skilled in React, Next.js, Node.js, Spring Boot, MongoDB, and MySQL, with practical industry experience as a Software Engineering Intern. Passionate about building scalable and impactful software solutions.

KEY SKILLS

- **Programming Languages:** Java, JavaScript, TypeScript, Python, Kotlin, Dart, PHP, C, C++
- **Frontend Technologies:** React.js, Next.js, HTML5, CSS3, Tailwind CSS
- **Backend Technologies:** Node.js, Express.js, Spring Boot, RESTful API Development, Microservices Architecture
- **Mobile Development:** React Native, Flutter, Kotlin, Android SDK, Expo
- **Databases:** MySQL, PostgreSQL, MongoDB, Firebase Firestore, Supabase
- **Cloud & DevOps:** AWS, Microsoft Azure, Docker, Git, GitHub, Apache Tomcat
- **API & Development Tools:** Postman, Insomnia, Swagger/OpenAPI
- **AI & IoT Technologies:** Machine Learning, Google Gemini AI, MQTT, ESP32, IoT Sensor Integration
- **Software Architecture & Concepts:** MVC, MVVM, Microservices Architecture
- **Tools & Platforms:** Visual Studio Code, Android Studio, IntelliJ IDEA, Arduino IDE, Figma, Power BI, MS Planner
- **Operating Systems:** Windows, Linux
- **Soft Skills:** Leadership, Teamwork, Communication, Problem Solving, Adaptability

EDUCATION

- **BSc (Hons) in Information Technology**
Sri Lanka Institute of Information Technology (SLIIT) | Jul 2022 – Sep 2026 (Expected)
- **Advanced Level Examination in Technology Stream (2020) :** Mahinda Rajapakshe College, Homagama
- **Ordinary Level Examination (2017) :** President College, Maharagama

EXPERIENCE

SOFTWARE ENGINEERING INTERN : Gamage Recruiters (PVT) LTD | Oct 2025 – Apr 2026

- Developed full-stack web and mobile applications using React Native, Next.js, Node.js, Spring Boot, MongoDB, PostgreSQL, and MySQL.
- Built RESTful APIs, authentication systems, and scalable backend services for business applications.
- Contributed to AI-powered and IoT-based solutions, participating in development, testing, and deployment activities.
- Utilized Git, GitHub, Docker, Postman, Swagger, Insomnia, and Microsoft Planner within Agile development environments.

CERTIFICATES

- AWS SimuLearn: Computing Solutions & File Systems in the Cloud, AWS Introduction to Amazon Simple Storage Service (S3)
- Microsoft Azure - Introduction to Virtual Machines & Microsoft Learn: Add and Size Disks in Azure Virtual Machines, Configure Azure Blob Storage
- Python Basics and Fundamentals (University of Moratuwa)
- Graphic Design (ICTS Computer School)

ACHIEVEMENTS

- Achieved 4th place in SLIITXtreme 2.0, an online programming competition organized by the IEEE Computer Society of SLIIT and the Software Engineering Community of SLIIT on October 4, 2023, demonstrating excellence in coding.

PROJECTS

1. PowerLink - AI-Driven Smart Mobile Electricity Monitoring & Management System

Developed an AI-powered electricity monitoring platform that enables households to monitor, analyze, predict, and optimize electricity consumption in real time. The system includes IoT-based appliance monitoring, electricity bill prediction, consumption analytics, issue reporting, and intelligent energy-saving recommendations. **Tech Stack:** Python, Machine Learning, React Native, Node.js, Express.js, MongoDB, MQTT, Firebase, ESP32, C++, JavaScript

2. Aura - Greenhouse AI Monitoring System

Description: Developed an intelligent IoT-based greenhouse monitoring system that collects real-time environmental data using sensors and analyzes it using Google Gemini AI. The system provides recommendations, email summaries, TFT display monitoring, visual and audible alerts, and automated issue detection to optimize greenhouse conditions. **Tech Stack:** Python, ESP32, C++, MQTT, Google Gemini AI, TFT Display, IoT Sensors

3. LibraCore - Library Management System

Developed a comprehensive library management platform supporting book inventory management, lending and borrowing operations, user management, transaction history tracking, and rental management. Implemented administrative features for managing books, users, and borrowing records efficiently. **Tech Stack:** Spring Boot, Next.js, MySQL, Java, REST APIs

4. BizzSup - Online Customer Support System for Business

A dynamic web application for handling customer queries and support requests, improving response efficiency by 30%. **Tech Stack:** HTML, CSS, JavaScript, PHP, MySQL via XAMPP

5. Event.lk - Online Event Management System (Java)

A responsive event management platform enabling event creation, user registration, and dynamic event listings, improving user engagement. **Tech Stack:** Java (JSP & Servlets), HTML, CSS, JavaScript, Bootstrap, MySQL, Tomcat (MVC Architecture)

6. The Flying Fish - Android Game App (Kotlin)

Android game where players control a fish to avoid obstacles and collect balls worth 10 and 20 points. Added 3-life system and a real-time scoring feature with game-over screen displaying current and highest scores. **Tech Stack:** Kotlin, Android SDK, SharedPreferences, XML

7. Note App (Kotlin)

Android task management app with features for task creation, modification, deletion, reminder alarms, and a 30-minute focus timer to boost productivity. **Tech Stack:** Kotlin, Android Studio, SharedPreferences,

8. Car Rental (Flutter)

A car Rental Mobile app, delivering a responsive, luxury-themed UI and real-time data management with BLoC architecture for state management, enabling cross-platform deployment (Android, iOS, Web). **Tech Stack:** Flutter, Dart, Firebase Firestore, BLoC, Android, iOS, Web

9. WN Restaurant - Restaurant Management System (MERN)

A restaurant management system for managing customers, staff, menus, orders, and finances. Added a payment method option. **Tech Stack:** MERN Stack, Firebase, Tailwind CSS

10. WN Restaurant - Restaurant Mobile App (React Native)

A restaurant mobile app that allows users to place orders, manage profiles, and make payments seamlessly, integrated with a web backend for real-time operations connected with the restaurant website's database. **Tech Stack:** React Native, Node.js, Expo GO, MongoDB, Firebase

11. FairyTalePlanner - Wedding Planning System (MERN)

A platform with 90% accuracy in budget and location based recommendations, Integrated Google Maps API to enable real-time location discovery, reducing venue search time by 40%. Managed vendor listings with admin approval, and supported advertisements enhancing planning efficiency for users. **Tech Stack:** MERN Stack, Firebase, Google Map API, Tailwind CSS

12. Travel Management Learning Platform (Spring Boot)

A web application combining travel planning and learning features, enabling 500+ users to organize trips and access educational content on a single platform. **Tech Stack:** Spring Boot, React.js, MongoDB, JavaScript, Firebase, Spring WebSocket

VOLUNTEERING

- **Treasurer, Leo Club of SLIIT (2025 - 2026)**
- **Project Chairperson, Project for Wild Life, Leo Club of SLIIT (2024 - 2025)**
Project "Born to Roam" - Led 3 project to protect turtles, honey bees and restore the coral on thangalle Best Project for Wildlife & Life Below Water, Leoistic Year 2024/25 - Winner of the District & Multiple District Awards.
- **Project Chairperson, Project for Environment, Leo Club of SLIIT (2023 - 2024)**
Project 'EcoSands' - Led 3 projects to protect the environment through beach cleanup initiatives, mangrove and kumbuk tree plantation. Best Project for Environment, Leoistic Year 2023/24 - Winner of District & Multiple District Awards.
